

Interpon D Project Notification Form

Commencement of Project

Use this form at the commencement of the project to identify the project conditions, obtain technical approval and secure a project warranty number so that you can commence ordering Interpon D products. This form will cover all future orders in relation to this project unless the product technology changes, for example D2015 to D2010 or the environment category of the project changes i.e. internal to external components. If this occurs then a new project number and further approval needs to be requested.

Please note that **THIS IS NOT AN ORDER FORM.** You will receive a Warranty number dedicated to your project once the details of the project have been approved by the Interpon Technical Manager. This number must appear on all Warranty Product Order Forms (WPOFs) to ensure your orders will be processed and to ensure details specific to this project are correct for warranty purposes.

You may submit this form with your Warranty Product Order Form (WPOF) or independently of the WPOF, depending on your requirements.

Applicator Details

Applicator No.
