# SPECIAL FEATURE

## NEW GUILLOTINE & BRAKE PRESS MACHINES

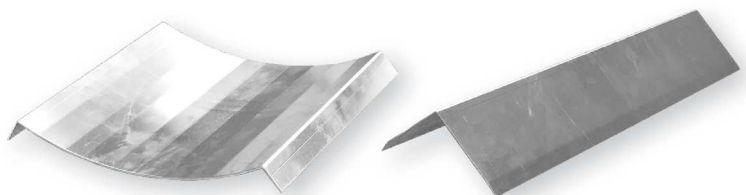

### *Now available in Darley's Victorian Office*

Darley is pleased to announce that the new aluminium guillotine and brake press machines are now in operation in the Darley Victorian office.

The guillotine machine cuts the aluminium sheets to size and the brake press machine folds & bends the sheets. Both machines have the capabilities to handle lengths of up to 3.6m sheets and a sheet thickness of 1.2mm to 4mm. We also offer the option of **In-house Powder Coating** for all aluminium sheets. Contact your Account Manager or local Darley branch to find out more.

Guillotine Machine	
Type of Sheet	Flat aluminium sheets cut to size
Lengths	Up to 3.6m sheets
Sheet Thickness	From 1.2mm to 4mm

Brake Press Machine

## DARLEY VICTORIA NOW OFFERING TIMBER REVEALS

Your one-stop-shop for all your aluminium window & door needs

We are pleased to announce that you can now order timber reveals cut to size with your KlassicView kits.

Darley's NEW timber reveals are:

- 138mm wide primed ALBASA timber
- Available cut to size to suit your kit order or in 5.8m lengths
- Made using a finger jointed laminating process
- Adhere to Australian standards with regards to shrinkage, moisture and warping of timber
- Responsibly sourced from timber plantations
- The new *Inline Reveal Adaptor* is also available to compliment the KlassicView line

**TO ORDER your timber reveals go to:** [www.darleyaluminium.com.au/Products/Order-Online](http://www.darleyaluminium.com.au/Products/Order-Online)

AutoLouve

# MOTORISED LOUVRE WINDOWS

AutoLouve™ **THE NEXT GENERATION**  
in motorised Louvre automation.

## Powerful concealed motor

AutoLouve™ is operated by a powerful linear motor that is directly connected to the Diamond Louvre gallery using our patented Radial Link®.

The Radial Link® combines the performance of the Diamond Louvre™ con-rod assembly with the power and reliability of the linear motor. AutoLouve™ delivers smooth, trouble free operation with maximum mechanical advantage.

The automation assembly is concealed inside the window jamb. The motor is accessed without removing glazing or the Louvre gallery via a removable panel.

## Advanced power and control

AutoLouve™ is powered by a safe easy to install low voltage power system. The motor, wiring and Radial Link® can be installed in the factory or onsite.

AutoLouve™ is compatible with commercially available CBUS and BMS automated building management systems, optimising environmental control and energy consumption.

AutoLouve™ is supplied standard with a fail safe circuit breaker.

Hand held remote controls are available in single and multi-channel frequencies.

## Insect screen

Insect and safety screens are installed from the inside of the Louvre frame, providing easy access for installation and cleaning.

Retractable insect screens can also be installed with the 102mm gallery providing increased air flow and the convenience of insect protection when required.

## Commercial framing compatible

AutoLouve™ couples directly to 101.6mm commercial shopfront systems. Frames can be installed using standard 100mm sub heads and sub sills. The system can be glazed using glass, aluminium or timber Louvre blades and can operate up to 27 blades from a single motor.

## Ready made

AutoLouve™ is conveniently supplied in pre-machined easy to assemble CKD kits.
