PHOENIX ACCESS WINDOWS - PREMIUM FLYSCREEN PORT

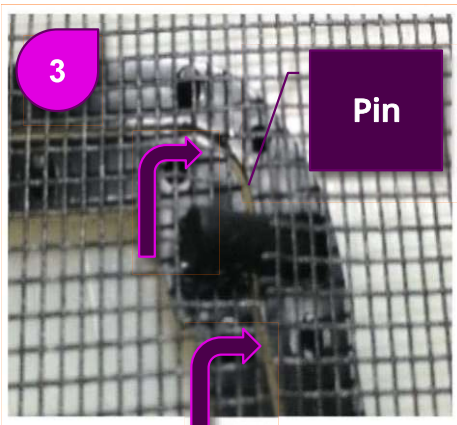

The new Phoenix Access Windows won't break because they have a pin hinge and an easy to use lever to keep the window shut. It is a better design to fit your hand through and they are easy to install.

Turn screen spline side up; lug goes on spline side.

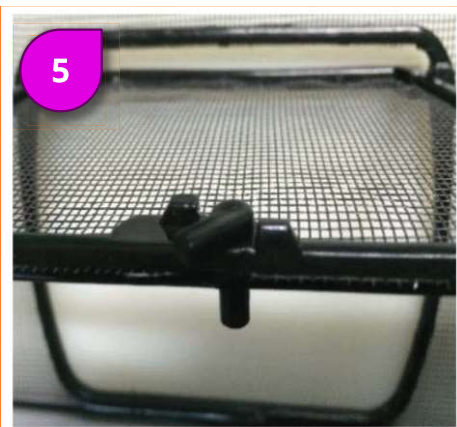

No lug goes under screen

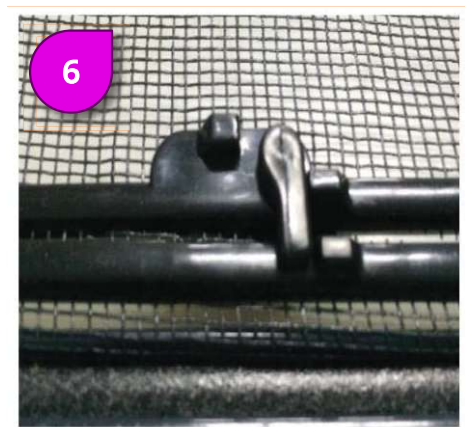

Cut mesh between and put pins under half of screen.

Hammer pieces together with hinge pins in place then cut mesh between.

Insert lever through hole and push handle tightly on other side.

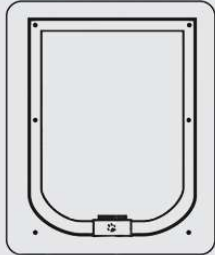

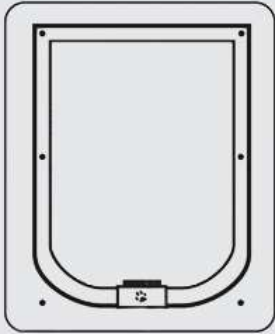

Finished lever position, spline side facing up.

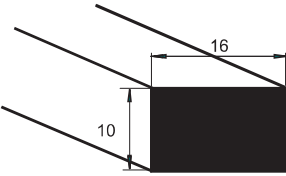

[YouTube Installation Video: Phoenix Access Window](#)

PET DOORS (NOT SUITABLE FOR GLASS DOORS)
